Conclusions

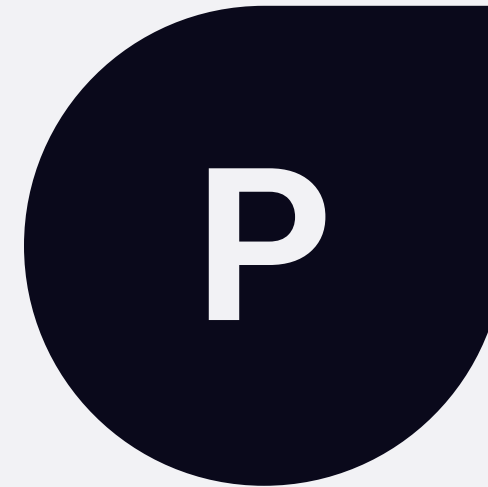

expand

mobile devices can help excellent teachers to expand their teaching to a wider range.

transform

the value of mobile device in teaching lies more in the fact that it can transform real teaching information into digital information.

participate

mobile learning can help the students take part in the class more actively.

adjust

online teaching should be adjusted according to the fact that mobile learning already became the mainstream of the online learning.

*92% learners use smart phone
74% more than half an hour one time*

Advices to improve the interaction

「**thank you.**」
