Refugees in the world

Complex rehabilitation needs

While there is an increasing demand for physiotherapy services among refugees, physiotherapists do not feel well prepared to address their complex rehabilitation needs.

What competences do PTs need to provide optimal services for refugees?

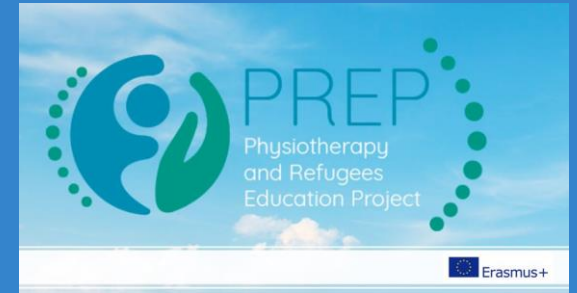

Required PT competences

What is next?

PREP goes online!

Next phase is to develop a curriculum relevant to the labour market that builds high quality skills and competencies of physiotherapists to provide services for refugees, using open education and innovative practices in a digital era.

Thank you!
